

## LES ROOFHATCH CLIMBSAFE

The LES RoofHatch ClimbSafe - Roof Hatch Guardrail provides permanent full-perimeter fall protection and improved egress and ingress for all roof hatches.

Roof Hatch Guardrail meets and exceeds numerous Standards and requirements for floor openings and walking/working surfaces. Zero Penetration attachment will not damage roof flashings, prevents moisture from entering the building, and will not void the roof warranty.

Each unit features patented GrabSafe™ handholds, providing 3-point control throughout egress and ingress. Guardrail extensions create a landing area to ensure safe operation of the self-closing gate while standing on the walking surface, not the ladder.
